I develop software for more than 10 years, mostly web applications. I'm experienced with Ruby, Clojure and SQL. Also gained knowledge about TypeScript.

I solved problems in different domains, led teams, mentored colleagues, was part of product and outsourcing teams, worked remotely and onsite.

I can help you to collect requirements, transfer knowledge to people, lay the foundation for the new app, design and implement key functionality, refactor the hairy one and more.

I'm familiar with agile methodologies, continues delivery (CD), test (TDD), behaviour (BDD) and data driven development. Like to work with small teams up to 6 engineers and pair programming.

Technical Skills

Likes: ruby clojure sql
Dislikes: angular

Experience

Software engineer / Team lead – Lockstep Labs   *Feb 2016 → Feb 2019*

Domains: e-commerce, visual analytics for retail banks, personal insurance in USA, education.

Languages: Ruby, Clojure, SQL, JavaScript, TypeScript.

Participated in development of different products, designed and implemented key functionality, led teams, on-boarded new team members, collected feedback from colleagues.

Software engineer – HipFlat   *Aug 2014 → Oct 2015*

Domains: real estate, crawling and parsing.

Languages: Ruby, JavaScript.

Participated in development of the product, designed and implemented key functionality, attended to architecture and performance of the backend system.

Ruby on Rails Developer / Team Lead – Arhont Information Security   *Mar 2012 → Aug 2014*

Domains: virtual data rooms, parsing.

Languages: Ruby, SQL.

Participated in development of the product, designed and implemented key functionality, attended to architecture and performance of the backend system, led the team, introduced and applied agile methodologies.

Ruby on Rails Developer – Tulp.ru   *Mar 2010 → Oct 2011*

Domains: review sites.

Languages: Ruby, SQL, JavaScript.

Participated in development of the product, worked on both backend and frontend systems.

Ruby on Rails Developer – JazzCloud   *Sep 2009 → Mar 2010*

Domains: e-commerce, scheduling systems.

Languages: Ruby, JavaScript.

Participated in development of different products, worked on both backend and frontend systems.

Ruby on Rails Developer – Development mill   *Jun 2007 → Aug 2009*

Domains: crawling and parsing, content management systems (CMS).

Languages: Ruby, Javascript.

Participated in development of different products, worked on both backend and frontend systems.

Education

M.Sc. in Databases (half-done) – Omsk State Technical University (OSTU)   *2010 → 2011*

Mathematics, software design and development, databases, networks.

B.Sc. in Informatics and Computer Science – Omsk State Technical University (OSTU)   *2006 → 2010*

Mathematics, informatics, software design and development, databases.

Readings
